

Azerbaijani President participates in ceremony of laying foundation for hospital in Agdash region

12.02.2010 18:41

On February 12, Azerbaijani President Ilham Aliyev took part in the ceremony of laying the foundation for the new building of the central hospital in Agdash region, AzerTaj state news agency reported today.

The Azerbaijani President was informed that 5.3 hectares of land have been allotted as part of reforms in the health sphere to build a hospital with 100 beds in Agdash region.

The total area of construction hits 22,500 square meters. The complex will consist of six buildings. Operations on landscaping and gardening will be made around the building, to be commissioned for two years.

The project also envisages construction of a pump, boiler, buildings for the protection of reservoirs, generators and transformers.

President Ilham Aliyev has laid the foundation of the building.

The President also got acquainted with the technical equipment of ambulances, donated by him to the hospital.

The President congratulated all employees working in the health sphere and wished them success.
